

Audatex Insight™

Repair Facility Analytics

Proactively monitor business key performance indicators

Intelligent Reporting for Collision Repairers

Audatex Insight – Repair Facility Analytics, is a next generation web-based reporting solution for the collision repair industry. It has been specifically developed to address reporting and business analysis needs of single shop owners and multi-shop organizations. This interactive tool provides an immediate snapshot of estimating performance, with customizable graphs and flags to highlight important trends. It is easy to use and provides the ability to drill down to claim level data in a single-click. Audatex Insight provides repair facilities with the same reporting capabilities used by insurance carriers, ensuring data transparency and consistency.

Measure, Track and Grow your business

Audatex Insight saves time for repair facility managers by eliminating the need to manually compile business metrics and key performance indicators (KPIs). With in-depth reporting and industry data from Audatex Insight, repairers can measure their performance against other shops in their area to gain a competitive edge in the market. Additionally, repair facilities participating in direct repair programs can access the same data and analytical tools as their insurance partners and can self-monitor KPIs to make the most of their insurance DRP relationships. Ultimately, Audatex Insight provides comprehensive analysis so that repairers can make informed business decisions—decisions that will help improve business productivity, strengthen existing DRP relationships and even help build new ones, resulting in increased repair orders and market share.

Audatex Insight - Repair Facility Analytics

Benefits and Features:

Consistency, Accuracy & Depth of Data

- Access 34 Key Performance Indicators (KPIs) that monitor business behavior
- Benchmark your business with localized industry data comparisons
- Receive 24 months of historical results to monitor trends for all DRP work controlled by your repair facility
- Identify “target areas” of growth opportunity areas with industry data “drill-in” capabilities to the postal code level
- Conduct trending and root cause and effect analysis
- View data from all three estimatics vendors (CCC®, Mitchell®, AudaExplore) in one place eliminating the need to purchase analytical tools from all three vendors

Easy-to-Use, Intuitive User Interface

- Easily create, modify, filter, share and save reports and dashboards with a highly visual and intuitive interactive interface
- Customize graphical views of industry data with no special training
- Automate your reports for easy distribution
- Instantly comprehend trends and find outliers with visual data representation

MONITOR TRENDS AND PARTNER KPI'S EFFORTLESSLY

Simple Customization Capability

- Create custom reports and dashboards by grouping and filtering data across many dimensions, including time, geography and vehicle (class, category, origin, age, make and model), insurance partners etc.
